Peppered Moth Simulation (Paper &

### Peppered Moth Simulation Biologycorner Answers

Like many moths in forests, the peppered moth tends to rest (or "perch") on tree trunks during the day. They do most of their flying at night. So it would probably be a good thing if the moths look similar to the trees that they perch on, right? Then they can be camouflaged from birds that want to eat them. Before the Industrial Revolution, the light peppered moth was common, while the dark form was very rare.
