Rig Tuning Guide

Fortunately, rig tuning is a straightforward step by step process for both masthead and fractional rigs. The goals in rig tuning are the following: (1) Eliminate side bend and lean, (2) Set mast rake for proper helm balance, (3) Set pre-bend to match the mainsail design, and (4) Control mast bend and headstay sag.

How to Tune Your Rig | North Sails

• Make sure all rigging screws are cleaned and lubricated with rigging screw oil. • Rigging screws with the upper thread swaged onto the wire (stud rigging screws) are threaded for extension by twisting the body clockwise. Fit this type of rigging screws to the standing rigging. • Fit all other rigging screws to the yacht's chain plates
