Cases - Exercises - Lingolia

Neither table is particularly easy to work with. Since table2 has separate rows for cases and population we needed to generate a table with columns for cases and population where we could calculate cases per capita. table4a and table4b split the cases and population variables into different tables which made it easy to divide cases by population. However, we had to repeat this calculation for each row.

Finding visual ways to describe a story is an exercise as old as time, and we often forget how powerful images can be to teach a lesson or tell a story. Have Students Write a Case Study. Have participants write a case study of their own. They can write about something that happened in their lives. This will usually be related to work or their business.
