organization system based on increasing atomic mass in 1864. He noticed that both the chemical and physical properties repeated every 8 elements and called this the \_\_\_\_ Law of Octaves \_\_\_\_\_. In 1869 both Lothar Meyer and Dmitri Mendeleev showed a connection between atomic mass and an element's properties. Mendeleev published

## Notes Periodic Table Notes

Notes. Values from CRC are ionization energies given in the unit eV; other values are molar ionization energies given in the unit kJ/mol. The first of these quantities is used in atomic physics, the second in chemistry, but both refer to the same basic property of the element. To convert from "value of ionization energy" to the corresponding ...
